

## UEPG Sustainable Development Awards 2020

**Company: Holcim Aggregati Calcestruzzi s.r.l**

**Location: Segrate, Italy**

**Integrated project for the Olona's river media valley fruition through forest improvement and hydraulic requalification**

The project of Holcim Aggregati Calcestruzzi was born with the aim of making degraded areas located along the Olona's river valley not longer in use, accessible to the local population. Integrated series of forestry and hydraulic requalification operations, insertion of new pedestrian and cycle paths with works of naturalistic engineering were made. The project was developed in close collaboration with the municipal administrations and the provincial authorities.
