

UEPG Sustainable Development Awards 2020

Company: VKB Aargau

Location: Aarau, Switzerland

Good marks for sustainability

The VKB Aargau and the Naturama jointly organised a commitment to the environment. The children were introduced to topics including the environment and biodiversity. The 30 stone lizards created new habitats for pioneering species of animals and plants in gravel pits. This attracted a lot of media attention and positive response from the public, which indicates that the campaign was a major success for the natural world.
